Suman Kumar

Full Stack Engineer

+91-7001769964 | sumankr0087@gmail.com | LinkedIn | GitHub

Skills

Languages: Python, JavaScript, TypeScript, SQL
GenAI & LLMs: RAG, LangChain, LangGraph, MCP, Prompt Engineering, Ollama
Backend: FastAPI, Django, Node.js, RESTful API, Microservices, JWT Authentication
Frontend: ReactJs, TypeScript, VueJs, NuxtJs, Streamlit
Databases: PostgreSQL, MySQL
DevOps & Cloud: Git, GitHub, Docker, CI/CD, Linux, AWS (S3, Lambda, ECS, KMS)
AI/Developer Tools: Cursor, Claude Code, Agentic AI Tooling
Python Libraries: Pandas, NumPy, Selenium, BeautifulSoup

Experience

Python Developer **March 2026 – Present**
Double9 Books, Noida *Python, FastAPI, Django, LangChain, LangGraph, MCP, Ollama*

- Develop high-performance **FastAPI** and **Django** REST APIs with JWT authentication, request validation, and async endpoints for business and AI-driven features.
- Architected **microservices**-based backend modules, splitting AI inference, data processing, and API layers into independently deployable **Docker** services.
- Built LLM automation with **LangChain** (tool calls, structured outputs, retries) and **RAG** pipelines so LLMs answer from internal documents, reducing hallucinations.
- Designed stateful multi-agent workflows with **LangGraph** (conditional routing, human-in-the-loop checkpoints) and built **MCP** servers to expose internal APIs and tools to LLM agents securely.
- Built Python data pipelines (Pandas, BeautifulSoup, Selenium) processing 5,000+ records, cutting manual effort by 60%; implemented concurrent batch processing to raise LLM inference throughput.

Software Development Engineer **July 2022 – February 2026**
Essentia SoftServ LLP, Delhi *Python, Django, JavaScript, REST APIs, PostgreSQL/MySQL*

- Developed 15+ scalable Django REST APIs for production B2B platforms integrated with ReactJs and VueJs frontends, improving frontend-backend communication efficiency by 25%.
- Built reusable **ReactJs** and **VueJs/NuxtJs** components with Hooks and state management for responsive B2B dashboards.
- Implemented JWT authentication and RBAC; optimized PostgreSQL and MySQL queries for large datasets.
- Worked in Git-based CI/CD agile teams across 25+ sprints; improved frontend and API performance by 40% via lazy loading and optimized state management.

Frontend Developer Intern **July 2020 – October 2020**
RightO *JavaScript, ReactJs, HTML5, CSS3*

- Built responsive pages and reusable UI components from design mockups and integrated REST APIs with backend developers.

Projects

ContextVault — AI Document Q&A with RAG | *Python, FastAPI, LangChain, Ollama, Chroma* **March 2026 – April 2026**

- Built a fully local RAG system for private PDF, TXT, and Markdown documents using LangChain and Ollama, keeping data and AI processing on-device.
- Implemented hybrid search (Chroma semantic + keyword) with FastAPI and Streamlit interfaces, streamed responses, SQLite chat history, and source references.

Automated Web Scraping & Reporting Pipeline | *Python, Selenium, BeautifulSoup, openpyxl, Pandas* **Oct 2025 – Nov 2025**

- Scraped 10,000+ product records and auto-generated Excel reports with charts, scheduled via Linux cron with logging, retries, and email alerts.

Episource Provider Portal – Healthcare Document Upload Platform | *Python, Django REST, ReactJs, PostgreSQL* **2023**

- Built a secure portal for healthcare providers to upload and track patient documents with JWT authentication, role-based access, and file validation; improved load time with lazy loading.

Certifications

- JPMorgan Quantitative Research Simulation – Forage (2025) | Deloitte Data Analytics Simulation – Forage (2025) | Data Analyst – OneRoadmap | SQL Course – Udemy (2024) | Python & Django Bootcamp – Udemy (2020)

Education

B.Tech. Computer Science Engineering **Graduated: 2021**
College of Engineering Bhubaneswar, Odisha *CGPA: 7.4 / 10*
